

**Reference on the services of the Aspenna, s.r.o. company**

The 1-800-Translate company has been offering translation services since 1982. Over the following twenty years we had managed to improve our experience relating to promptness, prices translation accuracy according to the needs of our customers. Now we offer the same high standard of service to businesses, organizations and individuals especially in USA.

In the realization of our translation projects, we use the services of the Aspenna, s.r.o. company. The first contact between our company and Aspenna took place back in the year 2003. Mostly we cooperate in terms of translations from English to European languages that the Aspenna company specializes in.

Over the five year that we have been cooperating the Aspenna company has completed hundreds of both smaller and bigger projects, most of which involved the EBI projects, in which case there was the need for extremely reliable and absolutely accurate and complicated translations of medication package leaflets into more than ten European languages.

We are very satisfied with the approach of the employees of the Aspenna company, as they have always been keen to help and cooperate and they have always tried to fulfill our requirements. This applies both to translation prime quality demands and to the promptness, the format required and DTP processing.

That said, we can highly recommend the services of the Aspenna, s.r.o. company.

We would like to wish the company to have many satisfied clients, just like we are.

Sincerely,

A handwritten signature in blue ink, appearing to read 'Fei-Xue Qian'.
